# Net Nanny® for Mac

PRODUCT DATA SHEET

Net Nanny 3 for Mac is the most effective and flexible parental control software available today for Mac OSX!

Our state-of-the art filtering technology ensures that your family won't be exposed to pornography or other offensive Internet content. Net Nanny is the most trusted family-oriented filter on the market today.

Manage Internet use from any browser, at any time, through a powerful Administration console. Net Nanny 3 can be used as configured right "out of the box" or you can customize settings according to your personal preferences and family needs.

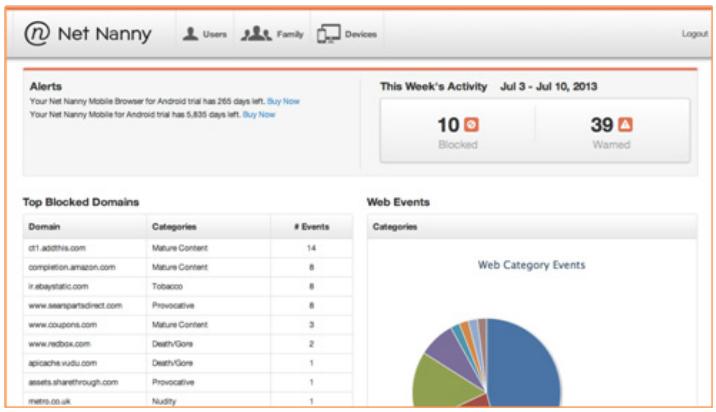
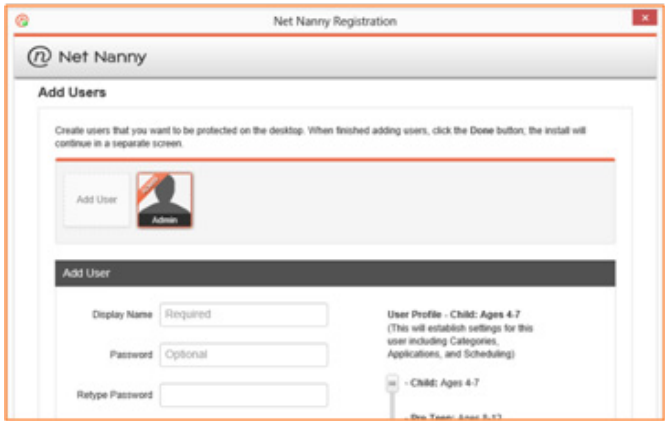
### Intuitive and Simple to Use



### Create Users Fast with Age-Based Settings



## What does Net Nanny 3 do?

- New, easy-to-use menus and features.
- Blocks porn and inappropriate websites.
- Blocks encrypted and secure proxy sites too.
- Create custom categories or whitelist.
- Enforces Google™ & other Safe Search features.
- Enhanced performance for faster Web surfing.
- Masks profanity before it appears on websites.
- Set time limits of Internet usage by user.
- Remote administration from any web browser.
- Send alerts and reports to your email.
- Customize settings by user.
- Includes Net Nanny Social – to monitor a teen's friends, pics, and posts on seven social networks.
- Supports Mac OSX 10.7 or higher.
- Supports 64-bit Browsers and Operating Systems.
- And much, much more...

## How does Net Nanny filter websites?

Net Nanny filters webpages in real-time. Every time you request a website in your browser, Net Nanny's dynamic analyzing engine will check the context of the website and will filter the webpage appropriately.

### #1 Rated Parental Controls

PCMag Editor's Choice

**3 Time Winner, 4.5 Stars**

★★★★½

PCMAG.COM EDITORS' CHOICE

*"Net Nanny remains the PCMag Editors' Choice for traditional parental control. It does everything you'd expect and goes beyond the competition in real-time per- page content analysis and resistance to attack by budding hackers."*

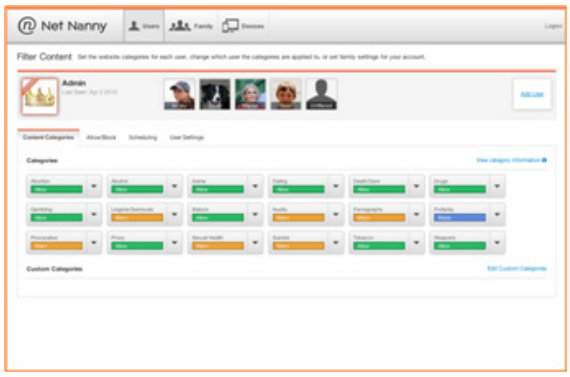
# Net Nanny® for Mac

PRODUCT DATA SHEET

**New, easy-to-use features and menus –** Net Nanny offers simple, easy-to-use menus and a set-up assistant to manage usage and to determine the websites and content categories deemed appropriate based on a child's age.

**Administration console –** A powerful web-based dashboard helps parents manage users and settings from any web browser. Net Nanny synchronizes settings automatically when made online.

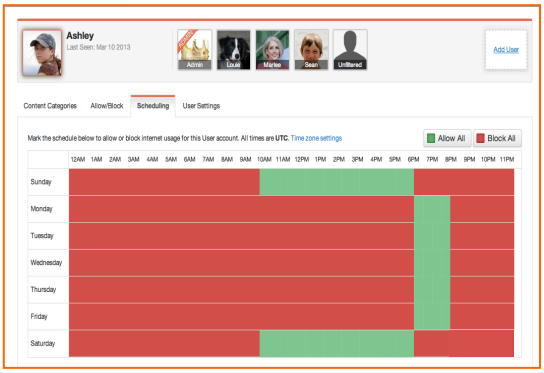


**Profanity masking –** Net Nanny can mask vulgar or profane words found on websites. Inappropriate words are changed on-screen by Net Nanny into symbols.

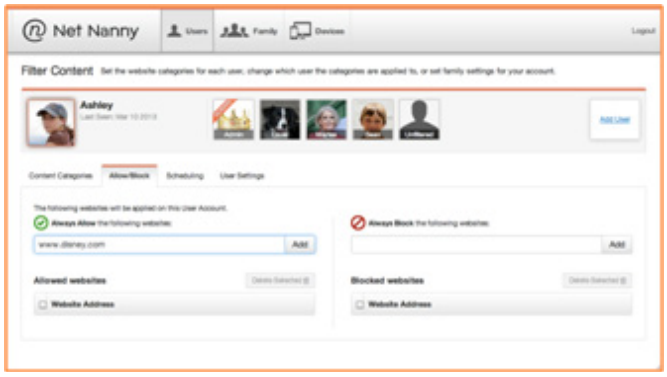
**Filtering of Encrypted and Proxy websites –** Using secure proxy and encrypted websites is the number one method used by tech-savvy teens to circumvent Internet filters. Net Nanny stops any attempt to get around filtering by blocking and filtering proxy and encrypted websites.

**Social Network Monitoring –** Net Nanny includes a free license of Net Nanny Social. This is a web-based dashboard that allows parents to monitor a teen's friends, pictures, and comments on Facebook™, Instagram™, Twitter™, Pinterest™, Tumblr™, Google+™ and LinkedIn™.

**Time Management –** Net Nanny allows parents to limit the time spent by a child surfing the web. Parents can set time ranges (hours and days of the week) when the Internet will be off limits, as well as setting a time allowance (available hours per week) when the Internet can be accessed.



**Customized Lists –** Net Nanny permits parents to create customized lists of unacceptable or acceptable Web sites by user or for the entire family. For example, a parent could set up a list (i.e., white list) of friendly websites that can be accessed by a child.



**Integration with Popular Search Engines –** Net Nanny enforces the "Safe Search" options found in popular search engines such as Google™, Yahoo™, and many others. This feature provides better protection against finding pornographic or nude images when doing an image-only search.

**Reporting –** Net Nanny provides reports visible from any web browser at any time. Parents can see which websites have been blocked or warned and the reason for the block/warn.

**E-mail Notifications –** Parents can be notified via e-mail when family members are trying to violate or override the policies defined.
